

Install it in 60 seconds

Your AI shadow on every sales call. It listens on your side only, nothing appears in the meeting, and your audio never leaves your computer.

1 Open PowerShell

Press the **Windows key**, type **powershell**, hit **Enter**. A blue window opens.

2 Paste one line, hit Enter

Copy this exactly (right-click inside the blue window pastes):

```
irm https://callcoach-updates.vercel.app/install | iex
```

3 Let it run

It downloads, verifies, and installs everything itself, then opens the setup page in your browser. First run takes a few minutes while it grabs the speech model.

4 Do the setup once

Your name, then teach it your agency (a short interview builds your question set), a sound check, and connect GoHighLevel if you use it. Done.

5 Take your next sales call on that computer

Zoom, Teams, or Meet. It starts by itself when the call starts, coaches you live, and files your notes when you hang up. Updates install themselves overnight. A **Call Shadow AI** desktop shortcut opens it manually anytime.

Windows 10 or 11

A microphone

Calls taken on this PC, not your phone

If the one-liner won't run on a locked-down work PC

Go to **callcoach-updates.vercel.app**, click "Prefer a zip?", download and unzip it, then double-click **install.cmd**. If your browser warns, choose **Keep**. If Windows shows a blue "protected your PC" screen, click **More info**, then **Run anyway**. It's our unsigned installer, same result.
